JUN'PERUS COMMUNIS KIYONOI
Natural Shape Without Shearing (See Page 8)

TO THE TRADE

Crichton, Ala.,
Oct. 1, 1929.

Thousands of homes in rural districts need more planting which would be planted had it not been for the high cost of specimen evergreens which have to be handled, balled and burlapped. Most of them are willing to wait for one or two years before they can get ultimate effect, but would rather plant small size choice Evergreens than cheaper shrubs. To buy B. & B. plants, paying packing and transportation charges, one can hardly resell any of them at less than two dollars each which will cut down the demand a great deal.

To fulfill this class of demand, we are offering this year what we call "Junior Specimen Size," which are intermediate size between lining out and specimen; field grown, sturdy, twice or more transplanted plants of about twelve inches or more which can be handled safely with puddled roots, yet large enough for lanscape works and retail nurserymen can resell them at fifty cents to one dollar each and still make money.

Long expected over-production on many lines begun to show its effect, reflecting on lower prices and often lower quality, which usually travel hand by hand. I realize prices of many items have been too high, but we have lowered our prices considerably by increasing our efficiency, better methods of production, large volume of business and smaller margin of profit, but not by lowering our quality nor service. Trinity of my motto is quality, service and value in the order named and on this basis I solicit your business.

With deepest gratitude to you who have supported our business so loyally and with renewed assurance that each and every one of your orders will be highly appreciated and will receive my best personal attention.

Yours very truly,

T. KIYONO.

TERMS AND CONDITION OF SALES

Prices. 5, 50 and 500 of same variety and size at 10, 100 and 1000 rates respectively. Where less than 25 of a kind ordered for plants quoted at 100 rate, please add 25%.

Terms of Payment—Cash with orders, from unknown people or those who prefer to earn discount. When cash with order, we make the discount 3% and boxing free, which means total earning of about 10%.

For charge accounts, our term is 60 days net, boxing at cost. New accounts opened only upon receipt of trade references, allowing time for investigation.

Transportation. Please state whether you want your shipments by parcel post, express or freight. When no instructions are given, we will use our best judgment in selecting best method of shipments. We make no charge for delivery to railroad station but our responsibility ceases when goods are turned over to carrier and risk and cost of transportation belong to purchaser.

Shipping Season. With ordinary weather conditions, from first of November to fifteenth of April.

Claim. If we made any mistakes or any reason to complain, please write immediately upon receipt of goods and we will be pleased to adjust the matter.

Condition of Sales. We accept all orders upon condition that they shall be void should any injury befall stock from causes over which we have no control.

LINING OUT CONIFEROUS EVERGREENS

JUNIOR SPECIMEN PLANTS

Baker's
15-18 inch

Spiny Creek
10-12 inch

Pfitzer
15-18 inch

Berckman's Golden
10-12 inch

Plants under this heading will be dug bare roots, saving almost entire root system. Puddled immediately so that you will receive plants with original moisture on roots.

Consideration of price is an important item when competition is strong, but do not let only lower prices blind you because almost all our lining out size plants were rooted in the fall and transplanted in early spring, giving them plenty room to develop full root system and stocky tops, **for an entire growing season** and entirely different plants from summer rooted cuttings transplanted in the late fall, merely to call them as once transplanted or potted, or those plants grown in crowded flats to let them get height but slender and "leggy". We give 20 square inches (about 4½ inch square) for each bedded plant, while most other nurseries allow them only 3 to 5 square inches.

Items marked with * and bold type letters are what we called "Junior Specimen Size" which can be shipped safely with puddled roots, yet large enough for landscape works or general retail business because they are sturdy field grown, twice or more times transplanted stock.

Per 100 Per 1000

Cedrus Deodara. The most beautiful stately specimen trees for the milder parts of United States. On account of entire seed failure last year, we are offering nothing but two-year-old plants which will stand outdoor planting with the exception of two smallest grades.

	Per 100	Per 1000
4-6 inch, two-year transplanted	\$ 5.00	\$ 40.00
6-8 inch, two-year transplanted	9.00	80.00
8-10 inch, two-year transplanted	12.00	110.00
10-15 inch, two-year transplanted	17.00	
*15-24 inch, two year transplanted	25.00	

Chamaecyparis Lawsoniana Alumi (Blue Lawson Cypress). Very blue lawson cypress of compact growth similar to Arborvitae in outline. Unlike from most of lawson cypress, this kind will transplant very easy. Our plants are from cuttings of extra blue good specimen.

6-8 inch, cuttings, 2-year transplanted	\$10.00	90.00
8-10 inch, cuttings, 2-year transplanted	12.00	110.00
*10-15 inch, bushy, field grown	25.00	

Chamaecyparis Lawsoniana Argentea (Silver Lawson Cypress). Similar to above with the exception of leaves having whitish cast of silky texture.

6-8 inch, cuttings, once transplanted ...	12.00
---	-------

Cunninghamia Lanceolata (Chinese Fir).

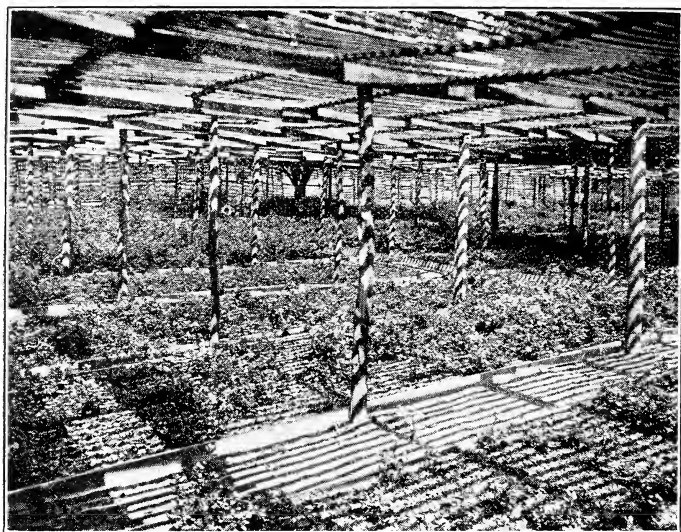

Fast growing fir shaped tree, doing well in lower South. We offer this in both seedlings and cutting grown plants, former coming true to type and while the latter will be poorly shaped for first year, they will make nice shape plants, leader coming up from ground.

4-6 inch, seedlings	7.00	60.00
6-8 inch, seedlings	9.00	80.00
8-12 inch, cuttings, once transplanted ...	12.00	110.00

Cupressus Arizona (Arizona Cypress).

Very fast growing bluish cypress which are valued in dryer parts of country, but

	Per 100	Per 1000
not so desirable in more humid climate where lower branches turn brown.		
4-6 inch, from seed beds	2.50	
6-8 inch, from seed beds	4.00	
Cupressus Sempervirens Pyramidalis (Italian Cypress). Well known very slender columnar tree of very striking appearance. We offer this year only those from cuttings, insuring absolute uniformity in shape.		
6-8 inch, cuttings, once transplanted ..	10.00	
Juniperus Chinensis Albo Variegata (White Variegated Chinese Juniper). An excel- lent Juniper doing well in south as well as far north. Slow growing conical shaped plants with many creamy white tips and branchlets. Our plants have more variegations than most others.		
4-6 inch, cuttings, once transplanted	17.00	
6-8 inch, cuttings, once transplanted	25.00	
*10-12 inch, bushy, field grown	45.00	
Juniperus Chinensis Japonica. Trailing Juniper with bluish scale-like foliage, doing well both in north and south.		
4-6 inch, cuttings, once transplanted	10.00	90.00
6-8 inch, cuttings, 2-year	15.00	130.00
Juniperus Chinensis Pfitzeriana. One of the best low growing Juniper of wide adaptability known too well for further description.		
3-6 inch, well rooted cuttings now ready ..	6.00	50.00
4-6 inch, cuttings, once transplanted	9.00	80.00
6-8 inch, cuttings, once transplanted	13.00	120.00
8-10 inch, cuttings, once transplanted	17.50	
*12-15 inch, bushy, field grown	35.00	
*15-18 inch, bushy, field grown	40.00	
Juniperus Conferta (Shore Juniper). Spreading Juniper well adapted for sea- shore planting but do well in most any location. Our plants are two-year twice transplanted stock.		
6-8 inch, cuttings, twice transplanted	15.00	
4-6 inch, cuttings, twice transplanted	12.00	

PART OF AZALEA HOUSE

	Per 100	Per 1000
Juniperus Communis Ashfordii. Similar to English Juniper but the top part of growth is more spreading.		
6-8 inch, cuttings, once transplanted...	10.00	90.00
8-10 inch, cuttings, once transplanted	12.00	110.00
Juniperus Communis Kiyonoi (Kiyono's English Juniper). Very compact and decidedly columnar growth with bluish leaves which assume plum color in winter. This was originated at this place a few years ago and every one of our offerings were propagated from single stock plant that every one is absolutely alike, without shearing, feature which is very important with formal shaped plants.		
4-6 inch, cuttings, once transplanted...	10.00	90.00
6-8 inch, cuttings, once transplanted...	12.00	110.00

	Per 100	Per 1000
8-10 inch, cuttings, once transplanted	15.00	130.00
10-15 inch, cuttings, once transplanted	17.00	150.00
Juniperus Communis Depressa (Canadian Juniper). Semi-elect juniper of wide adaptability. There are many types but we offer plants grown by cuttings from specimen of real merit.		
6-8 inch, cuttings, once transplanted	8.00	70.00
8-10 inch, cuttings, once transplanted	10.00	90.00
*12-15 inch, bushy, field grown	25.00	
Juniperus Communis Depressa Plumosa (Andorra Juniper). New spreading Juniper of real merit; main beauty about this new comer is its winter coloring of purplish hue, so different from any other plants. Supply on market is very limited.		
4-6 inch, cuttings, once transplanted	20.00	
Juniperus Excelsa Stricta (Spiny Greek Juniper). Slow growing compact Juniper valued highly for formal and foundation plantings, doing well both in south and north. All our plants are grown from cuttings from selected plants.		
3-5 inch, cuttings, once transplanted	10.00	90.00
5-8 inch, cuttings, 2-year-old	15.00	130.00
*8-10 inch, bushy, field grown	25.00	
*10-12 inch, bushy, field grown	30.00	
*12-15 inch, bushy, field grown	35.00	
Juniperus Japonica. This is not Creeping Juniper known as <i>Juniperus Chinensis Japonica</i> , but this one is upright grower with nothing but smooth scale like leaves, well adapted for rock gardens and foundation planting.		
4-6 inch, cuttings, once transplanted	12.00	
*10-12 inch, bushy, field grown	25.00	
Juniperus Japonica Sylvestris (Juniperus Femina). Similar to <i>Juniperus Chinensis</i> but more irregular in outline with light green foliage of both types common to Junipers. Very hardy and specially valuable for the South.		

	Per 100	Per 1000
6-8 inch, cuttings, once transplanted....	15.00	
8-12 inch, cuttings, twice transplanted	18.00	
*12-15 inch, bushy, field grown	40.00	
*15-18 inch, bushy, field grown	60.00	
Juniperus Procumbens (Creeping Juniper).		
A form of creeping Juniper with nothing but smooth leaves, never getting any taller than 12 inches above ground.		
6-8 inch, cuttings, once transplanted ...	12.00	
8-10 inch, cuttings, once transplanted .	15.00	
Juniperus Sabina (Savin Juniper). Slow growing semi-erect plants with dark green foliage which will not turn brown in winter. Stand city condition well.		
4-6 inch, cuttings, once transplanted ...	10.00	
6-8 inch, cuttings, 2-year	18.00	
Juniperus Virginiana Glauca (Silver Red Cedar. Well known silver red cedar so well adapted in wide range of country. Our plants are grafted and stake trained.		
One-year grafts	50.00	
*12-18 inch, field grown, B&B	80.00	
*18-24 inch, field grown, B&B	100.00	
Libocedrus Decurrens (Incense Cedar). A tall stately grower of majestic proportion, doing well in most part of this country, while its native home is California.		
4-6 inch, from seed beds	10.00	
6-8 inch, two-year-old transplanted.....	15.00	
Pinus Densiflora (Japanese Red Pine). Very attractive and indispensable tree for Japanese landscapes gardening with artistic shape.		
12-18 inch, 3 year old seedlings.....	5.00	40.00
*18-24 inch, 3 year old seedlings.....	6.00	50.00
Podocarpus Chinensis (Japanese Yew.) Dark green leaves of 1-3 inch by two inches long, with upright stems which can be pruned to any shape desired. They		

do well in full sun or very dark shade where nothing else will grow and extremely valuable for latter use. Only objection to this variety is of its slow growth, like many other Yews, but this point becomes its virtue a few years after planted against buildings.

Prices of *Podocarpus Chinensis* and *Podocarpus Macrophyllus* (large leaved Japan Yew):

4-6 inch, 2 year old	4.00	30.00
6-8 inch, 2 year old	6.00	50.00
8-12 inch, 2 and 3 year old	10.00	90.00
*12 inch up, 3 year old	15.00	130.00

Podocarpus Nagi. One of broadest leaved conifer, looking more like a broad-leaved evergreen, and a specimen in any garden will be a center of admiration and curiosity. Not hardy except in lower south. Very scarce.

4-6 inch, branched seedlings	15.00
------------------------------------	-------

Retinospora Ericoides. Leaves are somewhat similar to *Squarossa* but green in color and compact, columnar, fast grower.

6-8 inch, cuttings, once transplanted...	10.00
8-10 inch, cuttings, once transplanted..	12.00
10-12 inch, cuttings, once transplanted	15.00

Retinospora Filifera (Thread Cypress).

Long string like drooping branches hold thread like foliage of deep green color. Very hardy and graceful plant.

6-8 inch, cuttings, once transplanted...	10.00	90.00
8-10 inch, cuttings, once transplanted..	12.00	110.00
*10-12 inch, field grown, compact plant	20.00	

Retinospora Pisifera Aurea (Golden Sawara Cypress). Bright golden foliage is specially attractive in spring.

6-8 inch, cuttings, once transplanted...	10.00	90.00
8-10 inch, cuttings, once transplanted..	12.00	110.00
*10-15 inch, bushy, field grown.....	25.00	

	Per 100	Per 1000
Retinospora Plumosa (Green Japanese Cypress). All Retinospora we are listing are hardy all along the Atlantic Coast and Gulf States. Rather irregular outline of Retinospora are pleasing in contrast with stiff outline of Arborvitae. All our Retinosporas are from cuttings.		
6-8 inch, cuttings, once transplanted	7.00	60.00
8-10 inch, cuttings, once transplanted	9.00	70.00
10-12 inch, cuttings, once transplanted	10.00	90.00
*18-24 inch, field grown, compact plant	35.00	

Retinospora Plumosa Argentea (White Tip Japan Cypress). Very compact dwarf grower well adapted for planting in pot, etc. New growth has white tip.		
4-6 inch, once transplanted	8.00	70.00
6-8 inch, once transplanted	10.00	90.00

Retinospora Plumosa Aurea (Yellow Japan Cypress). Similar to Retinospora Plumosa but more compact and new growth is decided yellow.		
4-6 inch, once transplanted	7.00	60.00
6-8 inch, once transplanted	9.00	80.00
8-10 inch, once transplanted	11.00	100.00
*10-15 inch, field grown, very compact	20.00	
*15-18 inch, field grown, very compact	30.00	

Retinospora Squarossa Veitchi. Very pleasing silvery blue foliage of this plant makes very attractive with other dark green foliage plants.		
4-6 inch, cuttings, once transplanted	7.00	60.00
6-8 inch, cuttings, once transplanted	9.00	80.00
8-10 inch, cuttings, once transplanted	11.00	100.00
*10-12 inch, bushy, field grown	25.00	
*12-15 inch, bushy, field grown	30.00	

Thuya Orientalis (Chinese Arborvitae).
 These are from seed and not all alike but majority of them make pyramidal growth. Our 8-12 inch size two-year stock are suitable for under-stock, in grafting more valuable kinds.

	Per 100	Per 1000
6-8 inch, 2-year, from seed beds.....	3.00	25.00
8-12 inch, 2-year, from seed beds.....	5.00	40.00
*18-24 inch, selected field grown.....	25.00	
*2-3 feet, selected field grown.....	35.00	

Thuya Orientalis Aurea Conspicua (Erect Golden Arborvitae). What we are offering are three year old seedlings transplanted in field, seed being gathered from grafted plants at our own nursery and remarkably true to type, many of them being more compact grower than parent grafted plants, but retaining narrow pyramidal shape. Coloring is decidedly golden.

*12-15 inch, transplanted, field grown 25.00

*15-18 inch, transplanted, field grown 30.00

BLOCK OF JUNIOR SPECIMEN PLANTS
Berckman's Golden in Foreground

Thuya Orientalis Aurea Nana (Berckman's Golden). All our cuttings are from true dwarf Berckman's Golden, and absolutely true to type. This is one of our specialty and grow thousands of them an-

nually but never been able to supply the demand. We are offering better value than ever before. Our 6-8 inch size of this year are bushy, almost like field grown, having spread of almost 7-10 inch and larger field grown sizes are almost like specimen, ideal size for small landscape works or mail order purpose.

4-6 inch, cuttings, once transplanted	9.00	80.00
7-10 inch, cuttings, bushy	12.00	110.00
*10-12 inch, compact, field grown	30.00	280.00
*12-15 inch, compact, field grown	40.00	370.00

Thuya Orientalis Bakeri. Pleasing soft green color of pyramidal growth, retaining its color for summer and winter. The best pyramidal oriental arborvitae. Our last two sizes are almost like specimen, suitable for small landscape work.

4-6 inch, cuttings, once transplanted	8.00	70.00
6-8 inch, cuttings, once transplanted	10.00	90.00
8-10 inch, twice transplanted, 2-year	15.00	130.00
10-15 inch, twice transplanted, 2-year	18.00	160.00
*15-18 inch, compact, field grown	25.00	
*18-24 inch, compact, field grown	35.00	

Thuya Orientalis Beverlyensis (Beverly Golden Pyramidal). Stately columnar growth of deep golden color, getting more compact as they get older. Very fast grower.

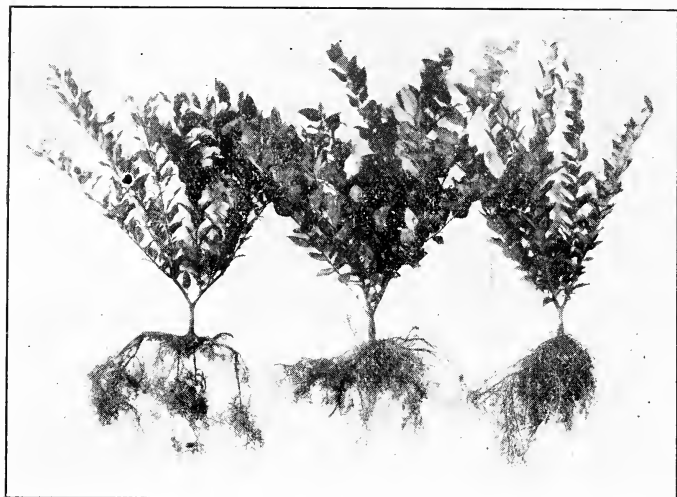

6-8 inch, cuttings, twice transplanted	15.00	
*18-24 inch, field grown	35.00	

Thuya Orientalis Bonita. Very compact slow growing Arborvitae of most symmetrical shape. Well adapted to wide range of country and very popular.

6 in., strong cuttings, once transplanted	10.00	90.00
6-8 inch, cuttings, once transplanted	12.00	110.00

Thuya Orientalis Compacta. Compact growing Chinese Arborvitae of more grove shape but most of these are more like Baker's Arborvitae, only a little broader and many are like the shape of Berckman's golden. Since these are

	Per 100	Per 1000
seedlings some will not come true to type.		
4-6 inch, two year transplanted.....	5.00	40.00
6-8 inch, two year transplanted.....	7.00	60.00
*8-12 inch, field grown	15.00	
*12-18 inch, field grown, 3 and 4 years	35.00	
Thuya Orientalis Excelsa. Broad and bushy, somewhat in shape of Berckman's Golden but good green color. Not so well known but one of the best compact arborvitae.		
8-10 inch, bushy, field grown.....	17.00	
Thuya Orientalis Glauca (Blue-green Arborvitae). Similar to Rosedale but not so fine nor compact and do not burn out like Rosedale.		
4-6 inch, cuttings, once transplanted...	10.00	
6-8 inch, cuttings, once transplanted...	15.00	
Thuya Orientalis Ramsey's Hybrid. A fast growing Arborvitae, similar in outline to cypress with thread like foliage. It will stand the heat and drouth well and very valuable in the South.		
5-7 inch, cuttings, once transplanted...	17.00	
7-9 inch, cuttings, once transplanted...	20.00	
Thuya Orientalis Rosedale. This soft, bluish Arborvitae is subject to the attack of aphid, but wherever they do well this is one of the most beautiful arborvitae.		
4-6 inch, cutting, once transplanted...	5.00	
6-8 inch, cuttings, once transplanted...	10.00	
*10-12 inch, compact, field grown.....	17.00	
*12-15 inch, compact, field grown	20.00	
Thuya Orientalis Texana Glauca. In outline of growth and color, this is similar to Arizona cypress, making strong center shoot and quick grower. Where Arizona cypress does not do well, this will take its place and really better because this will not grow as large as Arizona cypress and transplant far better.		
4-6 inch, cuttings, once transplanted...	8.00	70.00
6-10 inch, cuttings, 2 year	12.00	110.00
10-15 inch, cuttings, 2 year	15.00	140.00

LINING OUT BROAD-LEAVED EVERGREENS

Plants under this heading will be lifted with almost entire root system intact. Puddled immediately in thick mud and packed in moss, except where noted B. & B., which means balled and burlapped.

Items marked with * and bold type letters are what we call "Junior Specimen Size," which can be shipped safely with puddled roots, yet large enough for landscape works or general retail business because they are sturdy field grown, twice or more times transplanted stock. Florists who have limited growing ground will do well to plant them for only one year before offering them as regular specimen B&B plants.

Abelia Grandiflora. Pinkish white flowers
bloom all summer long, with small glos-

sy evergreen leaves, makes this shrub one of the most desirable specimen or hedge plants. The demand for this plant is growing larger every year. We have many thousands of better and bushier stock than we ever offered before.

6-8 inch, from cutting beds, ready

in spring	4.00	35.00
8-12 inch, cuttings, field grown.....	7.00	60.00
*12-15 inch, cuttings, field grown	10.00	90.00
*15-24 inch, cuttings, field grown.....	12.00	110.00

Azalea Amoena. Very hardy small leaved Azalea with purple-red double flowers.

Azalea Kaempferi. Another very hardy Azalea with large pink and red flowers and fast and large growing bush highly prized in eastern states.

Azalea Macrantha. Very compact growing plant with small leaves, blooming one of latest, usually in last of May and June on gulf coast.

Prices of three above hardy Azalea which will be ready for delivery in March of 1930:

4-6 inch, cutting grown	10.00	90.00
-------------------------------	-------	-------

Azalea Hinodegiri. Compact growing dwarf Azalea with mass of scarlet flowers in early spring, doing well as far north as coast of New Jersey. The demand of this azalea as pot plant is increasing very rapidly.

4-6 inch, bushy, transplanted in frames to be shipped with small ball of earth in spring of 1930	12.00	110.00
--	-------	--------

Azalea Indica. Single flowering, large growing kinds which are hardy on coast of North Carolina. We have most of commercial sort, in White, Light Pink, Dark Pink, Lilac-pink, Deep Red, Orange Red and Variegated.

Azalea Indica of small sizes do not

stand the frost of but a few degrees that we carry small plants in flames first winter and make the delivery after all danger of frost is over, with small ball of earth around each plant. Named varieties in all colors for spring delivery.

5-7 inch, branched	12.00	110.00
7-10 inch, branched	15.00	140.00

Barberry Atrocarpa (Barberry Sargentii).

Compact growing shrub so well adapted for foundation planting and this is only a few of Barberries which is at home in lower South. Numerous golden yellow flowers in early spring.

4-6 inch, cuttings, once transplanted....	8.00	70.00
6-8 inch, cuttings, once transplanted....	12.00	110.00
8-10 inch, cuttings, once transplanted..	15.00	130.00

Bignonia Speciosa. An evergreen vine with glossy, compound leaves, bearing numerous large size purple flowers in spring. Not hardy except in lower South.

8-12 inch, cuttings, once transplanted	10.00
*12-15 inch, cuttings, once transplanted	12.00

Buxus Japonica (Japanese Box). This is far better substitute for old time Boxwood (*Buxus Sempervirens*) which do not do well in lower south and dreadfully slow grower. This Japanese Box will withstand full sun on Gulf Coast, making three times more growth, with more roundish lighter green colored leaves. Makes splendid trimmed specimen but untrimmed, they will make ideal plants for foundation planting.

4-6 inch, cuttings, once transplanted....	6.00
*8-10 inch, 3 year old, field grown....	15.00
*10-12 inch, 3 year old, field grown....	20.00

Camellia Japonica. Waxy leaf, mid-winter flowering Camellia need no description. We grow only double flowering choice kinds which we offer them under color

Per 100 Per 1000

of White, Pink, Red and Variegated. All our plants were grown from cuttings and no seedlings offered. For larger plants, see under Specimen.

*10-12 inch, B&B 40.00

*12-15 inch, B&B 50.00

Camellia Sasanqua. Similar to *Camellia Japonica* but more of shrubby effect, growing faster, freer from scale injury, and bloom in October and November. We offer one named variety, *Mine-noyki*, which is double snow white flowers similar to carnation. Seedlings are all single flower, similar to flower of cherokee rose, ranging in color from white to red and intermediate.

Prices of *Mine-no-yuki*:

3-5 inch, cuttings, now ready 7.00 60.00

6-8 inch, cuttings, once transplanted... 12.00 100.00

8-12 inch, cuttings, once transplanted... 17.00 150.00

*12-15 inch, cuttings, once transplanted 20.00 180.00

Prices of *Camellia Sasanqua* Seedlings:

4-6 inch, two year old 6.00 50.00

6-8 inch, two year old 8.00 70.00

8-12 inch, two year old 10.00 80.00

Camellia Thea (Tea Plant). This compact growing evergreen shrub is not known widely but has many desirable qualities. Sweet scented flowers in late fall.

6-8 inch, from seed beds 4.00 35.00

8-10 inch, from seed beds 6.00 50.00

10-15 inch, from seed beds 8.00 70.00

*12-18 inch, bushy, field grown 25.00

Cleyara Japonica. Has thick, glossy leaves which turn red before dropping off. New growth is brown and quite hardy, withstanding cold of Atlanta or further north. Very desirable small size tree in any garden.

4-6 inch, cuttings, once transplanted... 12.00

6-8 inch, cuttings, once transplanted... 15.00

Per 100 Per 1000

Cotoneaster Panosa. Only a few Cotoneaster do well in south, but this is one of it. A beautiful shrub with slender branches clothed with small green leaves which are silvery white beneath.

Gardenia Radicans (Dwarf Cape Jasmine).

Miniature Cape Jasmine with leaves about 1-4 inch wide and one inch long. Pure white waxy flowers are identical with larger Cape Jasmine but only the size of one dollar silver. Growth is decidedly spreading, rarely getting taller than one foot high and ideal for planting in front of border or as pot plants. Our plants have white variegated leaves and even without flowers they are beautiful foliage plants. All sizes we are offering this year are very bushy compact plants.

YOUNG LIGUSTRUM AND NANDINA

VIEW SHOWING ABOUT ONE-HALF MILLION CHOICE EVERGREENS GROWING IN LATH HOUSE

An Invitation

We cordially invite you to visit us at any time. It would be a great pleasure to personally conduct you through our nursery.

T. Kiyono.

ONE OF THE FIELD VIEWS (ROWS ARE QUARTER MILE LONG)

and will make ideal sheared plants. Not so well known yet but have wide adaptability.

Ligustrum Lucidum Compactum (Wax-leaf Privet). Under this name many plants are offered, including seedlings which do not come true, but what we are offering are dwarf growing shrubs with very fine texture, free from attack of insects and diseases and surface. One of the most satisfactory plants for general planting, being free from attack of insects and diseases and fast grower, doing well in most adverse conditions. Our plants are well pinched back, having many branches and last two grades can be used for landscape work.

Ligustrum Lucidum Pyramidalis (Upright Wax-Leaf Privet). Leaves are rather pointed and not quite as thick as *Lucidum*, and the growth is decidedly upright. For corner [of house, between windows and as background planting, this is indispensable.

Ligustrum Lucidum Repanda (Crinkle Leaved Privet). Shiny narrow leaves are crinkled and growth is upright, making quite distinguished looking plants.

Ligustrum Ovalifolium Aureum. (Golden California Privet. Golden variegated leaves of this almost evergreen shrub is quite attractive among other evergreens.

*12-15 inch, bushy, field grown 10.00

*15-18 inch, bushy, field grown 12.00

Loquat (Japan Plum). Large size evergreen leaves makes this plant ornamental as well as useful on account of delicious fruit it bears. Quite a useful plant.

Malpighia Glabra (Barbados Cherry).		
Compact growing dwarf evergreen with small size pink flower similar to Crape Myrtle followed by red berries. Not hardy but when killed back by frost		

	Per 100	Per 1000
they will send new shoots and bloom same summer.		

4-6 inch, cuttings, once transplanted	5.00	40.00
---------------------------------------	------	-------

Nandina Domestica (Japanese Nandina).

Nandina is appreciated more highly in winter than any other time, when in its winter dress of red leaves and clusters of scarlet berries. This is a great advantage over many plants which are pretty in summer but may not look good in winter when we sell our plants, but Nandina in full dress will sell at sight. No wonder the demand exceeded supply and those who stock up with young Nandina will reap rich harvest. Measurement of our Nandina this year is taken by natural height of plants, including leaves which is general custom of grading Nandina by almost all nurserymen of this country.

2-4 inch from seed beds	5.00	40.00
4-6 inch, twice transplanted	8.00	70.00
6-8 inch, twice transplanted	12.00	110.00

Pyracantha Angustifolia. Narrow leaf orange colored berry of rather loose grower not so desirable as other *Pyracantha*.

Prices of all kinds of *Pyracantha*:

8-12 inch, cuttings, once transplanted	10.00	90.00
12-18 inch, cuttings, once transplanted	13.00	110.00
*15-18 inch, bushy, field grown	35.00	

Pyracantha Coccinea Lalandi (Evergreen Hawthorn). Desirable thorny evergreen with clusters of orange colored berries which color up late summer and hang on a long time.

Pyracantha Formosana. Compact and fast growing Pyracantha with small holly like leaves and red berries. This is the outstandingly good variety of all Pyracantha, having large scarlet berries which is produced in enormous clusters.

Pyracantha Gibbsi. Of recent introduction, having very small leaves and compact grower.

Pyracantha Yunnanensis. Spreading kind with broader smooth leaves and coral red berries. Not so susceptible to attack of scale insects. All prices of Pyracantha are the same.

Quercus Acuta (Japanese Live Oak). Hardy evergreen oak of Japan, used largely for ornamental purposes, having rich green foliage.

Quercus Cuspidata. This is another Japanese evergreen oak with smaller, thick leaves and used more largely for garden and hedge works. The acorn of this oak is edible.

Quercus Glabra. Another hardy Japanese evergreen oak very similar to Q. Acuta. New growth is pretty brownish color.

Prices of all three Japanese live oaks:

2 year old grafted plants	75.00
---------------------------------	-------

BLOCK OF BERCKMAN'S GOLDEN ARBORVITEA

SPECIMEN CONIFEROUS EVERGREENS

Under this heading we offer more than two or three times transplanted, field grown Conifers of symmetrical shape, many of them being staked, sheared or pinched. At prices quoted, all of them are balled and burlapped. On account of frequent transplanting and nature of our soil, however, all our plants have abundant fibrous roots and transplant well without being balled, for sizes of less than 2-3 feet, and should they be wanted without ball, we deduct 25c each on 2-3 feet and 15c each for less than 2 feet size.

For carload orders, where we can put in balled and burlapped plants without boxing them, or when you send your truck to our nursery grounds so that we do not have to crate them, we will deduct 15% from prices of both Coniferous and Broad-leaved Specimen plants, but this discount will not apply to lining out sizes quoted separately.

Balled and Burlapped Vis. Bare Roots Puddled

If you have to entrust your digging to careless help, without doubt, B&B is safe way of handling plants than

bare roots. On the other hand, we can save much more root system when we dig with bare roots than balling, and handled carefully, there is no danger of roots drying out before packing.

Bare root stock carefully dug, packed and shipped by express often do much better and far cheaper than B&B stock shipped by freight in less than carload lots. Whether B&B or bare roots, we will deliver our plants to you with original moisture on their roots.

ABELIA, 2-3 FEET

WAX PRIVET 2-3 FEET

SPECIMEN BROAD-LEAVED EVERGREENS

Plants listed under this heading are all more than twice transplanted, field grown, bushy and compact specimen, most of them pinched back several times. Many of them will transplant well without ball, especially when they are slightly cut back, and for bare rooted plants we make reduction of 25c each for 2-3 feet and 15c each for less than 2 feet. We realize more than ever the importance of low headed bushy broad-leaved evergreens that we sheared and pinched so many times they are as compact as they can be. As mentioned under heading of "Specimen Conifers," we deduct 15% on B&B plants, when you order in carload lot or send your truck to our grounds.
